

Air 1 definitely serves me as a resident of the local community. There would be a huge hole and a unfortunate negative affect if Air 1 was replaced by an LPFM broadcaster providing other programing. I truly believe in the great service provided by Air 1. I feel that with radio today, this is one of few, if any, stations that keeps things positive and uplifting. Most stations you can hear anywhere from 5 curse words in a couple of minutes, but you NEVER hear any from the Air 1 station. To take away this station from our local programming would be a major disgrace to those of us who genuinely care and are concerned about what the people in this community are exposed to. My radio station never changes from Air 1 and without it I wouldn't care even bother with the other radio stations. It is amazing that one positive radio station can have such an encouraging and beneficial impact on someone's life; and I know that if I have been so powerfully affected I know others have as well!
